

Application
**Biosynthonie Discs
for Body Healing**

Red Discs are made from Silicone with inclusions of nanoparticles of metals, minerals and gemstones. The importance of gemstones is one of the forgotten classical Chinese medicine modalities. Gemstone properties have been described and outlined in the major *materia medica* (the *Ben Cao*). *Li Shi Gen*, one of the earliest medical clinicians known mostly for his alchemical writings, noted that the most permanent treatments are derived from stones because stones test time in their evolution, and they do not decay as rapidly. In classical Chinese medicine stones are considered to be **living entities** which continue to change and evolve.

Another application could be based upon the fact that stones have high conductivity. They are major conductors of energy.

Discs can be used up to
15000 times

- ◆ Restore natural emotional and physical harmony
- ◆ Use natural and non-invasive techniques to balance the Chi energy in the body

Biosynthonie Discs

The mineral composition of Biosynthonie Discs contains nanoparticles of boron, calcium, tourmaline, magnesium, manganese, sodium, potassium, lithium, hydroxyl and fluorine. Because of its electrical properties, it is used for frequency balancing of acupuncture points.

Discs have the same effect if not stronger than traditional needle acupuncture.

These minerals are known to assist the body in getting rid of radiation and heavy metals.

A powerful chelation stones help to draw toxins out of the bones, as well as pull out whatever damages the DNA, i.e., cancer, radiation, mercury poisoning, infections, chronic fatigue—all manifestations of “pestilent qi”.

Free radicals in the body are neutralized by negative ions. Negative ions are generated by nanoparticles in the Discs when they are in contact with kinetic energy. This is called a piezoelectric effect.

Biosynthonie Science

Biosynthonie is a non-invasive natural therapy used to mitigate the harmful effects of electromagnetic and geopathic stress, while at the same time supporting and enhancing the body's own natural energy pathways. The specialty discs used within *Biosynthonie* may help a person to reduce harmful effects of electromagnetic pollution and other energetic stressors.

Biosynthonie Discs are made from ceramic or silicone composed with inclusions of uniquely arranged silica, metals, minerals and other crystals. These crystals give off their own waves that block and eliminate harmful electromagnetic pollution coming from electrical components and sources. All manmade electromagnetic waves have a 2-dimensional sinus form. All naturally occurring waves that we need and are beneficial to us have a 3-dimensional vortex form.

Biosynthonie Disks interact with these 2-dimensional waves eliminating and converting them into beneficial **vortex waves**.

Biosynthonie restores the normal vortex waves using resonance phenomena. The stone particles memory of silicone or ceramic discs resonate and create vortex waves whenever they are exposed to natural or artificial waves.

The various crystalline materials in the discs emit beneficial **vortex waves** that restore the correct information to the body, thus improving its functions both physiologically and energetically. This phenomenon results in greater well-being, as well as acceleration of physical, emotional and mental healing.

Biosynthonie can also be used as a form of **natural therapy**. Ceramic and silicone discs designed to stimulate the body's acupuncture points act like **tuning forks** that re-energize

Biosynthonie Discs removes free radicals

Negative ions also stimulate formation of blood vessels, increased blood flow and higher blood oxygen levels. Negative ions scavenge free radicals, reduce oxidative stress and reduce inflammation.

Ancients civilizations and especially Ancient African Civilizations used the same technology for healing and initiation.

Distilled water is used to activate nanoparticles in the Biosynthonie Discs. Stones soaked in distilled water detoxify and release .

The water in the body serves as a recording mechanism and carrier of information just like videotape, the hard drive of a computer or any other magnetic media. The information received by the body from the natural waves serve to regulate the body's biorhythms, organ and glandular functions. These waves also modulate the DNA .

WARNING: Please wash your hands after handling the Biosynthonie Discs. Don't rub eyes or touch mouth. It can cause irritation. If accidentally you touched your eyes or mouth rinse them with large amount of clean water.
